

Student Health Centre

Overview

The Student Health Centre provides primary healthcare services specifically for BHU students. It acts as the first point of medical consultation and basic treatment.

The centre maintains student medical records and health booklets and provides routine healthcare support.

 - Medical leave documentation
-

Laboratory Services

Many diagnostic tests are available free of cost for students, including:

- Blood tests
 - Stool examination
 - Urine examination
 - Sputum tests
 - X-Ray facilities
-

Important Instructions for Students

The following instructions are provided to students regarding the Student Health Centre:

1. Students should always carry their health diary/booklet while visiting the health centre.
2. The health diary serves as the student's medical identification and medical record.
3. It is compulsory to bring the health booklet during treatment. Students are advised to keep it safely because penalties may apply if it is lost.
4. Students should properly note the doctor's advice and treatment instructions in the diary for future medical reference.
5. Treatment should be taken only using the student's own health booklet. Using another student's booklet for medicines or treatment is punishable.
6. If a doctor advises bed rest and the student remains absent from classes, the student must obtain a proper medical certificate within 15 days according to university rules.
7. During closure of the Student Health Centre or in emergency situations, students may visit Sir Sunderlal Hospital OPD or Emergency Department with their health booklet.
8. Under the university's Student Health Welfare Scheme, most diagnostic tests at Sir Sunderlal Hospital are available free of cost.
9. If a student gets admitted to Sir Sunderlal Hospital, investigations and treatment expenses (except medicines) are generally provided free of cost.
10. Students may receive medical reimbursement according to university procedures:
 - Up to ₹20,000 for normal treatment reimbursement
 - Up to ₹50,000 for serious treatment requiring intensive care or hospitalization
11. Since all medicines may not always be available at the health centre, students may need to purchase unavailable medicines themselves.
12. For complaints, suggestions, or information regarding medical facilities, students may contact the office of the Chief Medical Officer.

Student Health Welfare Scheme

Key Benefits

The university provides healthcare support to students through the Student Health Welfare Scheme.

Benefits Include:

- Free or subsidized medical consultation
 - Free diagnostic tests in many cases
 - Emergency treatment support
 - Hospital admission support
 - Medical reimbursement assistance
 - Access to specialist healthcare
-

5. Importance of BHU Medical Facilities

The medical system at BHU is highly beneficial for students because it:

- Provides affordable healthcare
- Ensures immediate medical attention
- Supports academic continuity during illness
- Offers advanced hospital facilities inside the campus
- Gives access to specialist doctors and emergency services
- Maintains student health records systematically
